How to Change librenms logo to your institute logo

1. Go to following images directory

Cd /opt/librenms/html/images

- 2. Copy image "librenms_logo_mono.svg" into your pc
- 3. Edit the image by an image editing tool
- 4. Save as svg (you may have to use image conversion tool)
- 5. Copy back to same location in librenms server
- 6. Change ownership to librenms

sudo chown librenms:librenms /opt/librenms/html /images/ librenms_logo_mono.svg

7. Refresh librenms web page

How do I move my LibreNMS install to another server?

- Install LibreNMS as per our normal documentation; you don't need to run through the web installer or building the sql schema.
- Stop cron by commenting out all lines in /etc/cron.d/librenms
- Dump the MySQL database librenms from your old server (mysqldump librenms -u root -p > librenms.sql)...
- and import it into your new server (mysql -u root -p < librenms.sql).
- Copy the rrd/ folder to the new server.
- Copy the config.php file to the new server.
- Ensure ownership of the copied files and folders (substitute your user if necessary) chown -R librenms:librenms rrd/; chown librenms:librenms config.php
- Re-enable cron by uncommenting all lines in /etc/cron.d/librenms

Using librenms Andriod App

- 1. Install mylibrenms app into your android device
- 2. Add new site by ticking Api token and scan QR code in your pc librenms
